Commenting on the results, Mr. C.S. Nopany, Chairperson, Magadh Sugar & Energy Ltd said:

“Although there is a downward revision of the initial estimates, India will still be producing significantly more sugar than its domestic consumption. Consequently sugar prices remained under pressure both domestically and internationally. The Central Government took a number of proactive steps to address the issue of mounting cane arrears by reimposing the monthly release mechanism, production subsidies and encouraging exports. These initiatives have helped to stop the continuous slide in sugar prices. The new Bio Fuel Policy of ethanol blending will also have a positive impact on the demand supply scenario of sugar in India.

I am happy to state that Magadh Sugar is focussed on the highest levels of efficiency and is recording the highest recoveries in Bihar. We are well placed to reap the benefits of our efficiency improvement schemes when the sugar cycle turns.”

Key Highlights

- Ethanol supplies to OMCs at 144 lac litres, as against 90 lac litres during 9 months of last year.
- Focus on increasing yield per acre, debottlenecking and energy efficiency measures will result in savings in operational costs and improvement in margins
- Better working capital management and rationalisation of cost structure, coupled with varietal improvement of sugar cane; will bring long term positive results
